

Hit the Ground Running with GIS Training

Classes held at Marshall University Graduate College

South Charleston, WV

SPACE IS LIMITED!

Level 1 May 5, 6, 7, 2009

Cost \$300

Level 2 May 19, 20, 21, 2009

Cost \$300

Sign up for both Level 1 and Level 2 by April 3 and receive both for \$515.00! A savings of \$85.00

What You Receive

Geospatial Information Systems usage is exploding in all business sectors. Professionals and support staff are finding GIS a tool that gives them the ability to integrate and relate any data with a spatial component. The visualization of data provides a basis for decisions in the design, implementation and support of projects.

Level 1 and Level 2 provide experiential and project learning experiences to enable you to immediately begin to use the latest version of ArcGIS. You will gain basic awareness of GIS concepts, with the ability to successfully navigate ArcGIS software. You will also be able to produce your own maps using attribute and spatial data, and also learn how to perform some initial types of spatial analysis.

Who should attend?

Participants should possess basic computer skills and working knowledge of spreadsheets and data bases. Level 1 and Level 2 offer basic instruction applicable to many sectors including:

- Engineers and Surveyors

- Community Police and Emergency Responders
- Economic and Community Developers
- Health agencies
- County mapping staff
- Environmental agencies
- Sales and Marketing Representatives
