## WV Datum and Legislative Changes

President LeMasters,

The WVAGP Technical Committee has been working on behalf of WVAGP to provide the WV Society of Professional Surveyor's (WVSPS) comments to their proposed WV Datum and Legislative Rule change proposed to be in effect for next year. In this effort, WVAGP members were asked to participate in the Technical Committee review and contribute their ideas to the proposed changes. If the WVAGP Board approves, we would recommend the following revised language from the WVAGP Technical Committee to the WVSPS. In addition, I would recommend our revision text be accompanied with a letter of gratitude, expressing the WVAGPs appreciation for the invitation to participation in legislative changes that effect our membership.

The Technical Committee would specifically like to extend it's appreciation to Pete Dailey, Mike Zoltec, Tony Semintal and John Green for their efforts on this task.

Respectfully,

Kevin Kuhn  
WVAGP Technical Committee Co-Chair (Former)  
GIS Analyst / Instructor  
West Virginia University

### Recommended Text

"The accuracies of the coordinates stated at the 95% confidence level and in compliance with the Geospatial Positioning Accuracy Standards established and published by the FGDC in effect at the time of the survey. The coordinate accuracies reported by the surveyor will take into account the network accuracy of the existing control, as well as any additional systematic effects."
